To use an electronic bike locker:

1. Find a bike locker that is not in use. Available lockers will say “NO CHARGE. PARKING AVAILABLE.”

2. Once you locate an available locker, insert your BikeLink card face up and chip first.

   If your BikeLink card is inserted into a card slot associated with only one available locker, the screen will indicate “LOCKER SELECTED.” Please leave your BikeLink card inserted. If your BikeLink card is inserted into a slot associated with two available spaces, the screen will briefly display either “RIGHT DOOR SELECTED. START OVER FOR LEFT DOOR” or “LEFT DOOR SELECTED. START OVER FOR RIGHT DOOR.” If you want to select a different locker, remove your BikeLink card and start over.

3. After a bike locker space is selected, the screen will display “PRESS BUTTON TO START RENTAL.” Press the circular button at the bottom right side of the controller.

4. The screen will display “RENTAL STARTED. REMOVE CARD TO OPEN DOOR.” Remove your BikeLink card and the locker will open automatically. Open the door, insert your bike, and close the door.

The screen will display a four-day expiration countdown. You have now successfully initiated a reservation. After four days, the locker will be considered expired and although the contents will still be secure, they should be removed. If the contents are left in a locker for ten days, the locker will be considered abandoned. If this happens, the contents may be removed and the user’s bike parking privileges may be revoked.
To remove your bike from an electronic bike locker:

1. Return to the bike locker you are using. Insert your BikeLink card face up and chip first.

2. The screen will ask if you want to retrieve your bike. Press the circular button at the bottom right side of the controller to proceed.

3. “RENTAL ENDED. REMOVE CARD TO OPEN DOOR” will appear on the screen. Remove your BikeLink card and the door will open automatically. Retrieve your bike and close the door. Your session has ended.

**important:**

*If a bike locker reservation is not completed correctly, the locker can be accessed by any BikeLink user. Please follow all steps to complete your locker reservation.*

If you experience any issues with your BikeLink card, call eLock Technologies at (888) 540-0546.
